ACADEMIA Range

Chemical Resistant Scholastic Fume Cupboards

Modulab's ACADEMIA Range of fume cupboards are specially designed for schools and other academic institutions. The range is made up of three different size models. All fume cupboards in this range are made from light weight, chemical resistant Polypropylene therefore little to no degradation is caused by chemical fumes and spills. All fume cupboards are available with the option of a pre-fitted, built-in extraction fan making installation quick and simple. Simply place the unit in desired position, feed the flexible discharge ducting through an open window or pre-cut hole in the wall, plug the unit into a power socket and you are ready to immerse yourself in the wonder of science. Customers may purchase the fume cupboard module without the storage cabinets should they wish to mount the unit on an existing counter or frame.
